GREYHOUND RETIREMENT AND END OF LIFE REPORT JULY – SEPTEMBER 2020

Foreword

Each quarter the Greyhound Welfare & Integrity Commission (the Commission) publishes a report providing data in relation to reported retirements, euthanasia and deaths of greyhounds registered with the Commission in NSW. The publication of this data is designed to provide transparent, accurate and timely reporting of these events.

This report contains data relating to the first quarter of 2020/21, being the period 1 July to 30 September 2020. As this is only the fifth edition of this report, trend analysis is limited.

The Commission will continue to evolve the structure and content of the report to enhance its utility.

Data Sources

The statistics contained in this report for greyhound retirements and deaths relate to notifications received by the Commission from registered participants in the relevant reporting period, in accordance with relevant Commission policies, including the Commission's Rehoming Policy.

Statistics relating to euthanasia that occurs at racetracks are based on data recorded by the Commission's On-Track Veterinarians. All other euthanasia statistics relate to notifications received from participants, including where applicable, certifications from the veterinarian who performed the euthanasia.

Retirements reported during the quarter

Retired greyhounds who no longer race, usually become pets either in or outside the industry or are retained in the greyhound racing industry for breeding. The Commission was notified of 392 greyhound retirements that occurred between 1 July – 30 September 2020 (see Table 1).

Of the notifications received, 122 greyhounds (or 31.1% of the total) were retained by their registered owner or trainer as a pet and these dogs remain registered with the Commission. A further 59 (15.1%) retired greyhounds were notified as being rehomed privately, by their owner or trainer, to someone outside the greyhound racing industry. These greyhounds will now be registered on the Companion Animals Register.

The remaining 211 greyhounds (53.8%) were notified to the Commission as being rehomed to pet rescue or rehoming organisations. The largest single greyhound rehoming program in NSW is the Greyhounds As Pets (GAP) program managed by GRNSW, and during this quarter the Commission was notified of 73 (18.6%) retirements to GAP. A further 138 greyhounds (35.2%) were accepted for adoption by other animal rescue and adoption agencies.

The Commission was not notified of any greyhounds being exported from Australia during this quarter.

Table 1: Greyhound retirements reported to the Commission 1 July – 30 September 2020

Destination	Number	%
Retained by owner or trainer	122	31.1%
Rehomed privately by owner or trainer ¹	59	15.1%
Accepted by Greyhounds As Pets (GAP)	73	18.6%
Accepted by another animal rescue or adoption agency ²	138	35.2%
Retired for export	0	0%
Total	392	

¹ Rehomed to a member of the public as a pet.

² Accepted by another animal rescue or adoption agency including pet rescue organisations, RSPCA, AWL or council animal care facilities.

Euthanasia reported during the quarter

On 1 December 2019 the Commission updated its Rehoming Policy³ to require greyhounds that could previously be euthanased following certification by a veterinarian as being behaviourally unsuitable for rehoming to be subject to rehoming requirements.

The Commission expects that greyhounds with behavioural problems undergo a behavioural assessment via GAP or other suitable canine behavioural expert and attempts are made to rehabilitate and re-home these greyhounds. At least two attempts must be made to re-home any greyhound retiring from the industry before euthanasia can be considered.

This quarter seven greyhounds were reported as having been euthanased due to a veterinarian certifying that the greyhound was behaviourally unsuitable for re-homing. In every case where a behavioural euthanasia is reported to the Commission, enquiries are conducted to determine if a breach of the Rehoming Policy has occurred.

A total of 124 greyhounds were reported as euthanased between 1 July – 30 September 2020. Ninety-nine (79.8% of the total) were performed by private veterinarians when the greyhound was suffering from an intractable illness that causes significant pain or discomfort, or a marked reduction in quality of life, such that is inhumane or would otherwise compromise the welfare of the greyhound to delay euthanasia.

There were no reported cases of emergency euthanasia by a person other than a veterinarian. The injuries most commonly reported by veterinarians as resulting in medical euthanasia were severe bone fractures.

Ten greyhounds were euthanised by Commission veterinarians due to a catastrophic injury that occurred as a result of racing.

A further seven were reported as euthanised on behavioural grounds and nine after rehoming attempts failed.

Table 2: Greyhound euthanasia reported to the Commission 1 July – 30 September 2020

Cause	Number	%
Medical euthanasia (not at racetrack) due to injury, illness, or an emergency ⁴	99	79.2%
Euthanasia after registered veterinarian certified that the greyhound was behaviourally unsuitable for rehoming ⁵	7	5.6%
Euthanasia at racetrack due to injury	10	8%
Euthanasia after rehoming attempts failed	9	7.2%

³ The Rehoming Policy can be found at <https://www.gwic.nsw.gov.au/integrity/rulesandpolicies/re-homing-policy>.

⁴ 'Emergency' refers to euthanasia performed by a non-veterinarian in the case of an emergency. The circumstances surrounding any emergency euthanasia are examined by the Commission to ensure they were in accordance with the Commission's policies and the *Prevention Of Cruelty To Animals Act 1979*.

⁵ From 1 December 2019 any greyhound that has not otherwise been rehomed privately must be subject to multiple attempts to rehome the greyhound.

GREYHOUND RETIREMENT AND END OF LIFE REPORT JULY – SEPTEMBER 2020

Total	125	
--------------	------------	--

Deaths reported during the quarter⁶

A total of 44 greyhound deaths were reported between 1 July – 30 September 2020 of which 21 (47.7% of the total) were from natural or unknown causes, 12 (27.3%) due to illness and old age and 10 (22.7%) due to accidental causes. There was one sudden death at the racetrack.

Table 3: Greyhound deaths reported to the Commission 1 July – 30 September 2020

Cause	Number	%
Deceased due to accidental causes ⁷	10	22.7%
Deceased due to illness and old age ⁸	12	27.3%
Deceased due to natural or unknown causes	21	47.7%
Sudden death at track	1	2.3%
Total	44	

⁶ The data in this section is categorised based on the information provided to the Commission by participants.

⁷ Examples of accidental causes include paddock injuries, snake bites and fights.

⁸ Common illnesses associated with greyhounds include stomach torsions, twisted bowels and cardiac failure due to old age.
